

## Pathway Group Chair: Lung Cancer

---

### 1 Programmed activity per week

RM Partners (RMP) is the Cancer Alliance across north west and south west London and covers a population of 3.9 million people. We are hosted by The Royal Marsden NHS Foundation Trust and work with health organisations including all NHS acute trusts in west London, our two STPs (north west and south west London), clinical commissioning groups, specialised commissioning, community services, hospices and third sector and voluntary organisations.

RMP runs a number of Pathway Groups assembled from healthcare professionals across northwest and southwest London that meet to share experience, best practice and innovation in the delivery of services. The Pathway Groups consider the recommendations of the National Cancer Taskforce to 2020 and provide clinical leadership to support the delivery of specific transformation projects.

There is an opportunity for the appointment of a new chair for the Lung Cancer Pathway Group. The Lung Cancer Pathway Group meets on a bi-monthly basis and is supported by the RM Partners senior leadership team, informatics services and project management.

Over the past 2 years the RM Partners Lung Cancer Pathway Group has been leading on the implementation of two cancer transformation projects for lung; The Low Dose CT case finding for lung cancer project and the national optimal lung cancer pathway (NOLCP) pilots. The pathway group has provided input and oversight to ensure that the projects are successfully delivered and that there is on-going engagement and lessons learnt for West London. The pathway group will use the project evaluations and recommendations to inform the 2019/2020 lung cancer priorities and oversight of future cancer transformation projects.

The appointee will provide leadership for 1 Programmed Activity (equivalent of 4 hours) per week to develop the pathway agenda, to chair the bi-monthly meeting and associated sub-groups. The appointee is accountable to the RMP Medical Director, and tenure is until March 2019 in the first instance and until March 2020 pending confirmation of transformation funding.
