

What is the NCV ?

The Cancer Vanguard was established to pilot and roll out new models of care that will provide innovative high quality cancer care across the whole patient pathway. Its overall goal is to improve cancer care, survival rates and patient experience.

How long will it take to see outcomes ?

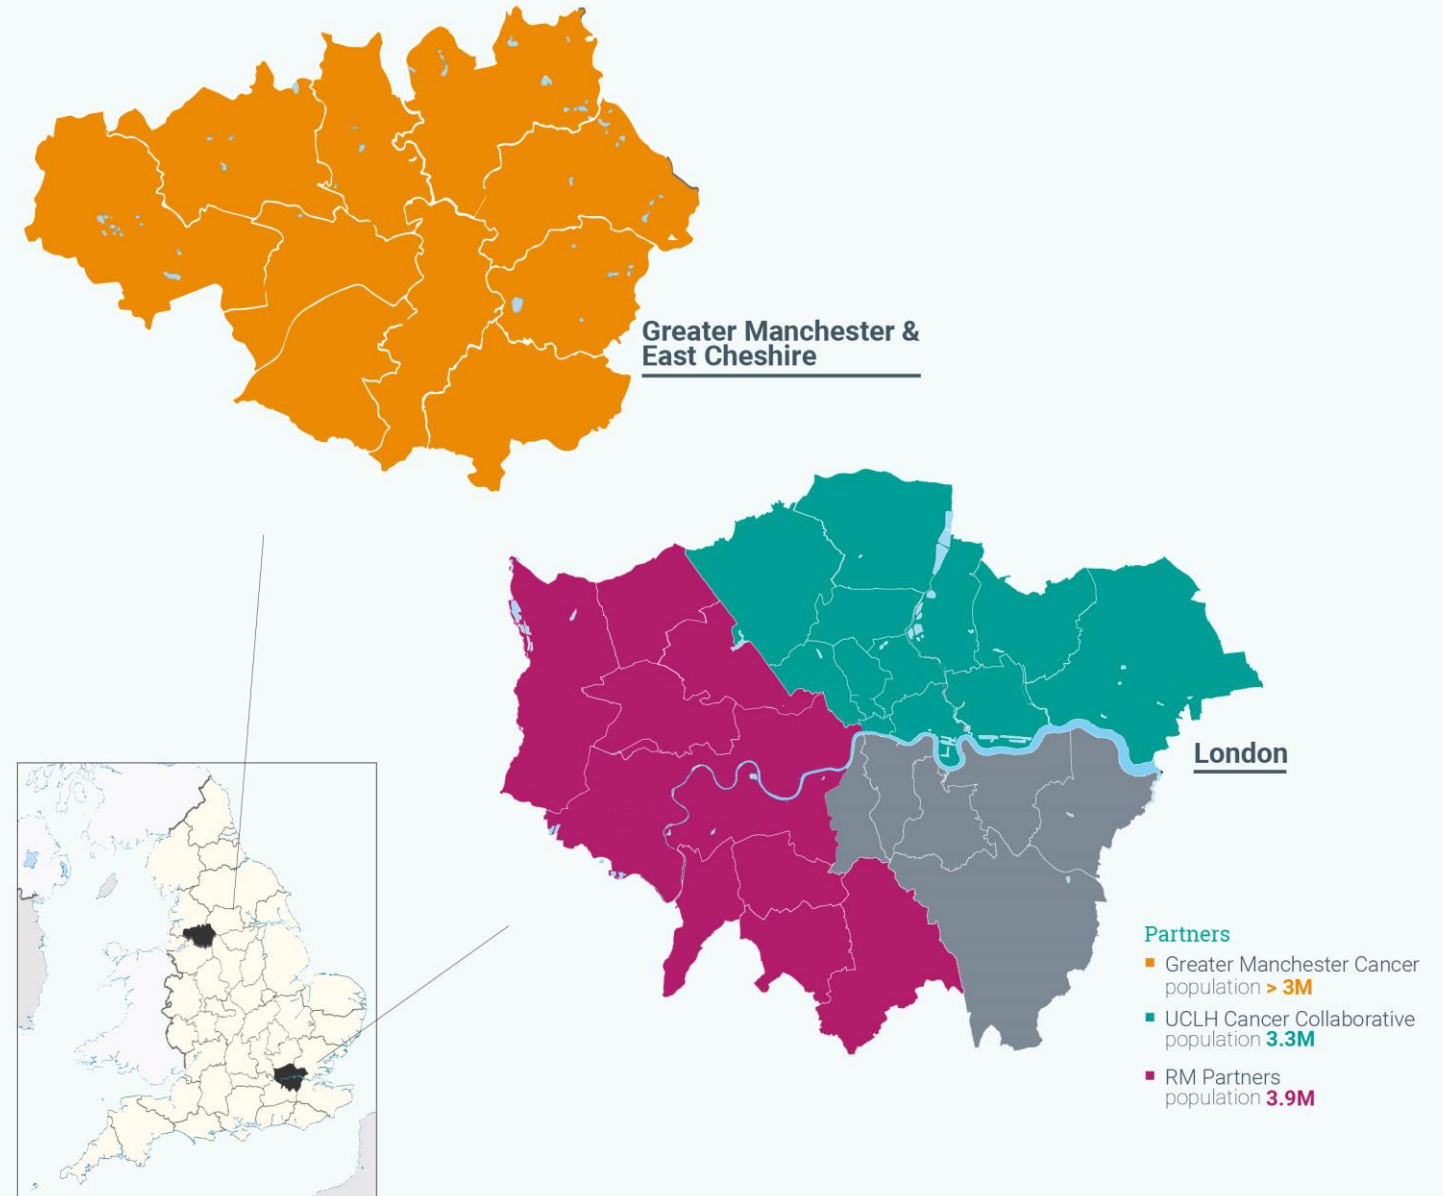

The evaluation of the programme is spread over three years. The findings shown here are a result of the first year evaluation.

What is the NCV trying to achieve ?

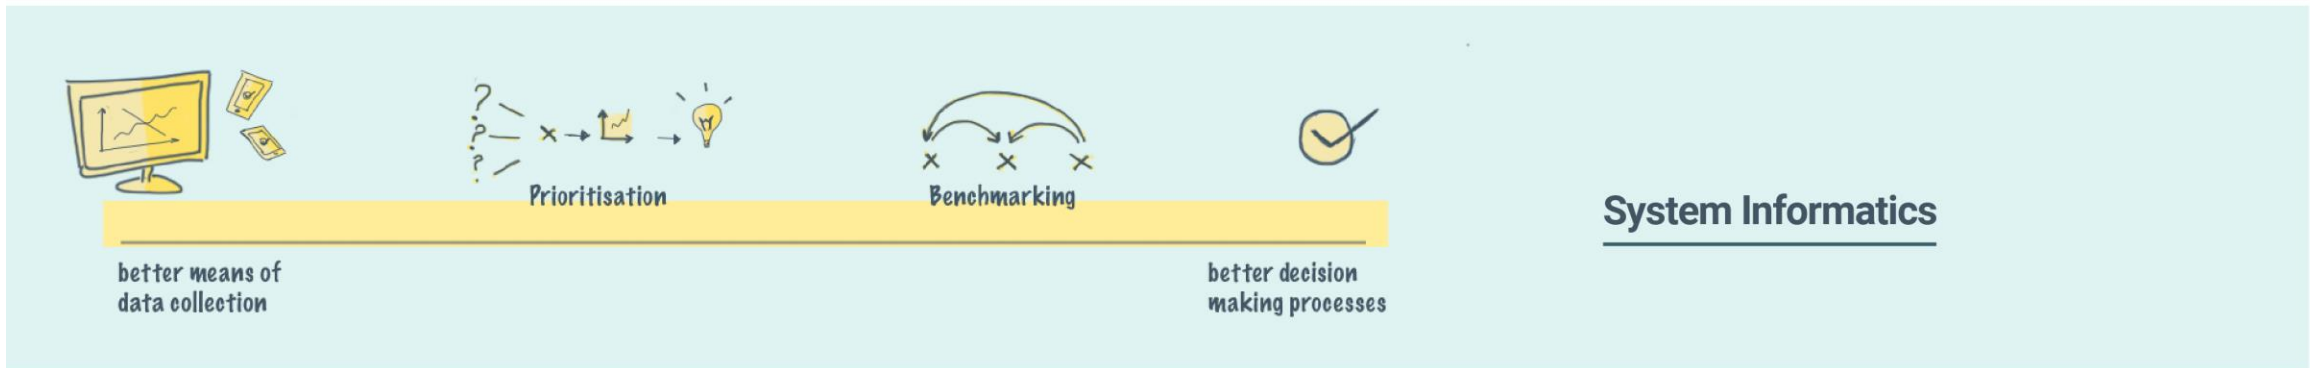

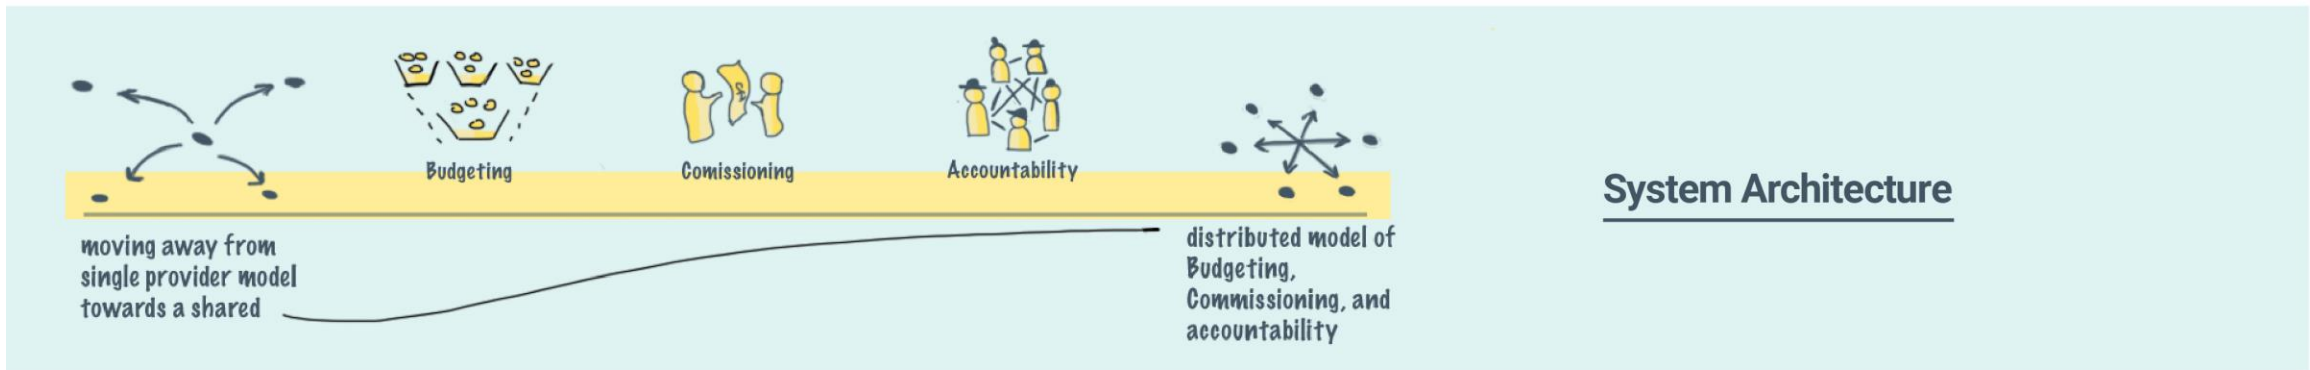

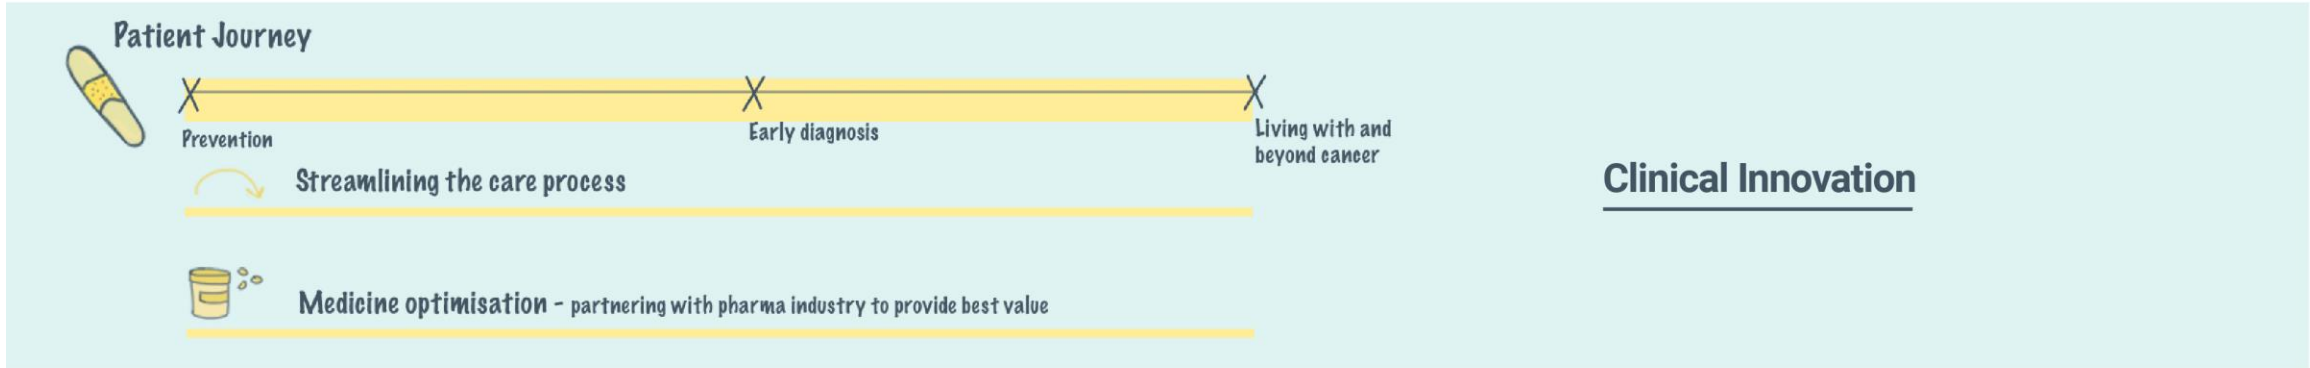

- to improve cancer outcomes
- to improve patient experience
- ✓ to improve system resilience & efficiency
- ✓ to improve leadership
- ✓ to share knowledge and spread learning

✓ evaluated   • not evaluated yet
